

Appendix 9

Eligibility Outstation Locations

As part of Wisconsin's Medicaid outreach plan, Medicaid applicants in many counties may have their eligibility determined at convenient "outstations" in hospitals, clinics, and community-based organization offices. By making it easier for applicants to apply for Medicaid, more potential people may participate in the program. The outstations offer applicants the timesaving benefit of allowing them to schedule appointments. In addition, applicants may apply for other benefits such as food stamps and child care at the outstations.

Ashland County

Bad River Health Department*
